FIRE PROTECTION ENGINEER

Thermal Engineering Corporation is a mechanical engineering consulting firm located in Honolulu, Hawaii. We currently do not have full time entry level fire protection engineer positions available. However, resumes will be accepted for future consideration if employment opportunities become available.

Position: Entry Level Fire Protection Engineer

Qualifications:

1. Education: Bachelors of Science degree in fire protection engineering from an accredited four-year program. Bachelors of Science degrees in mechanical, civil, or electrical engineering from an accredited four-year program will also be considered.
2. Communication Skills: Excellent communication skills including the ability to write logically and concisely and the ability to speak with other engineers and architects, staff personnel, clients, contractors and vendors.
3. Personal Skills: Highly attentive to detail and quality, self motivated, willingness to travel, team player, goal oriented, and ability to manage time well.
4. Other: Proficiency with Microsoft Excel and Word, AutoCAD, project management, and/or consulting experience, are positive advantages.

Applicants with prior engineering experience, including preparation of design drawings, specifications, and cost estimates are a plus. Applicants will be considered who have relevant design experience in government, industrial, or commercial sectors.

Applicants should e-mail a resume and list of current references to Melvin Harano at harano@thermaleng.com.
